

## WHY GROW LINC?

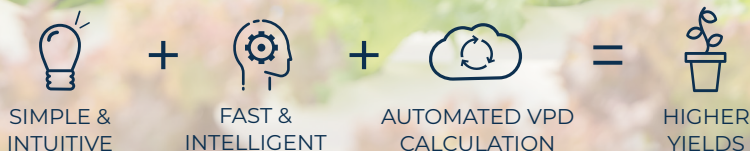

We have simple, innovative solutions for our clients growing operations. Our service and technology delivers.

Grow Linc monitors all of your rooms under one powerful hub so you can make real-time decisions to **maintain an ideal growing environment** during each stage of your plant's life.

- Repeatable Yields. Repeatable Results
- Simple. Proactive. Innovative
- Maintain consistent, ideal growing conditions

## KNOW YOUR SCORE

- We have automated the calculation of the vapour pressure deficit (VPD)
- Real-time and historical data monitoring
- Understanding your VPD, enhances your cycle rate and yields larger plants

*A unique, innovative system to intelligently manage your processes, and enhance growth and yield.*

## GROW YOUR BEST PLANTS

By maintaining the right temperature and humidity with Grow Linc and VPD, you will see improvements in your operations.

- ✓ Reduction in environmental issues like mould and mildew
- ✓ Reduction in pest problems
- ✓ Healthier plants and higher yields
- ✓ Enhanced plant nutrient and CO<sub>2</sub> uptake

Ready to improve **YOUR** processes?  
Get in touch today.

*When producers grow with an understanding of vapour pressure deficit, they enjoy increased cyclical rates and more substantial development of their crops.*

## HOW WE DO IT

### Optimization

Maintain proper environmental conditions for optimal plant growth and health.

### Actionable data

Capture accurate data at the right time to turn it into action for better overall results.

### Increased quality and yield

A consistent temperature is the key to maximizing yields and quality.

### Reliability

Long-range, wireless LoraWan networks with rugged sensors ensures connectivity within any environment.

### Peace of mind

Monitor your operation in real-time to keep your investment safe.

## Why choose us?

Check-It Solutions' founders have decades of experience providing innovative IoT solutions to improve growing operations from producing larger tomatoes to achieving higher-yielding cannabis crops.

### Flexible and easy

The fully customizable menu lets you monitor your growing conditions from anywhere, mobile to desktop!

### Uniquely connected

The user-friendly interface connects all of your rooms with one, single hub all while using a sustainable, low energy battery.

### Intelligent processes

The Grow log, integrated tracking journal helps analyze if plants are in optimal growing conditions.
